

The Frontenac Arch is an ancient ridge of granite joining the Canadian Shield and the Adirondack Mountains. Where the St. Lawrence River floods over the top of the Arch at the eastern end of Lake Ontario, it forms the beautiful Thousand Islands. In 2002, the Frontenac Arch area was designated as a UNESCO World Biosphere, stretching from Brockville to Gananoque, up to Westport and over to Sydenham and Harrowsmith. Biospheres support and promote sustainable development in the environment, economy, society and culture of their community.

If you live, work or play in the Biosphere, and want to celebrate its beauty in an original music composition, send in your entry.

Visit www.fabn.ca for details & entry forms

IMPORTANT DATES:

- Call released: October 2011
- Compositions to be received by: 5 pm, February 29, 2012
- Applicant notification: end of April 2012
- Awards Gala: Fall 2012 - to be announced

The Frontenac Arch Biosphere will be known to all who live and visit here as a world-class example of a successful sustainable community. We will celebrate our natural, economic and human qualities and forge a new way of working, living and growing together.
